

Specifically manufactured for the **Solar battery industry**

Features include:

- Made of aluminum
- 19" rack mounts with slide-in shelves for battery module mounting
- Battery capacities ranging from 20.48kwh (8 battery module cabinet) to 30.72 KWh (12 battery module cabinet)
- IP54 protection rating
- Fully welded construction, 3mm aluminium powder coated RAL7035 light grey finish
- Double door with no centre mullion, unobstructed access to all equipment
- Robust 3-point locking system
- 180° opening doors
- 3mm aluminium mounting pan powder coated white
- Gland plates fitted internally
- Ventilation fans with rain protection openings, thermostatically controlled
- Supplied with DC Bus system
- Battery management system included for BYD battery modules

Save time on-site and provide the customer with a neat, safe enclosure for their solar system installation.

The cabinets are sized to enable mounting of all inverters and charge controllers in the same panel. This makes the installation much safer, whilst keeping all equipment out of sight and protected from the elements. The cabinets are made of aluminium, making them easy to position and providing a long service life.

A slide-in racking system allows for easy installation of 19" rack-mount style battery modules, along with door-mounted thermostatically-controlled fans for cooling and ventilation.
